

Properties of fibers practicals - Exercise last + deadline

Dear students,

I remind you the last practical exercise will be done on 6.11. 2023. **Please BE ON TIME!** The exercise is only for viewing, without calculations, but it is necessary to pass it for credit.

The date 6 November 2023 is also the **DEADLINE FOR COMLETING PRACTICALS EXECRISES**. After this date, you stay at home and do not go to school in person.

At home, you calculate the calculations in Excel for each exercisess and send them by email to me for checking.

Deadline is not set for calculations and reports. It depends only on you, how much time you need.

Of course, if you need a personal consultation for calculations, I am here to help. In that case, write me email and we will agree on a free time when you could come.

Regards!

Jana Zusková
