

Assignment of the seminar task - course TT2

Full-time study

Part-time study

Field "Clothing technology "

Task:

1. Select one clothing product, determine at least one significant useful property of it, and select the test and appropriate measuring device for testing this property.
Get information from the excursion in the Department of clothing technology laboratories, from study materials and consultations.
2. Match the selected garment (it can be the same as in point 1 or choose a different one) with at least 2 matching stitches and seams used to make it. You can take a picture of the garment in the report or draw it and mark the selected seams.

Notice:

Length: at least 2 pages A4

Submitting the task: elearning.tul.cz

Don't forget to cite sources of literature and images!

In case of any ambiguities or questions during the preparation of the task, contact your seminar teacher.
